Profile

I am a highly competent developer with a proven track record in creating web solutions, whether using a modern framework, or a more classical approach. I'm strong technically, and enjoy meaningful team collaboration on projects. I am eager to be challenged in order to grow. My greatest passion is furthering my own skill set, but currently I'm focusing on React.js and making web apps accessible for all.

Skills

Personal - Attention to detail, organized, empathy, team player, able to work individually, loyal, logical.

Languages - JavaScript, TypeScript, PHP, HTML, C#.

Frameworks - React, React Native, NextJs, Gatsby, Laravel, CRA.

Styling - CSS, SCSS, LESS, CSS Modules, Styled Components.

Testing - Jest, React Testing Library, Cypress.

Tooling - Webpack, Babel, JQuery, Grunt, Yeoman, Redux, Git, NPM, Yarn, Docker, Storybook.

CMS's - Wordpress, Strapi, Contentful, Umbraco.

Backend - Node, REST, GraphQL, MySQL.

CI - Jenkins, GitHub Actions, CircleCI.

Work Experience

Deltatre - June 2022 - Present - Senior Software Developer - Primarily I developed and maintained a suite of streaming clients that run various smart TVs and consoles, for Canada's largest media conglomerate. Serving millions of customers on a daily basis.

As a senior member of the team my day to day duties usually involve hands-on development work, mentoring other team members, participating in technical meetings with clients, contributing to

work planning & scoping.

Some of achievements I've made while working at Deltatre I'm proud of are:

- Heading up several accessibility projects.
- Taking ownership of our antiquated codebase modernisation.
- Upskilling and mentoring an entirely new team, due to the old one being rapidly phased out.
- Introducing various initiatives to boost team morale and cohesion.
- Working on enhancing our automated testing, by adding new unit tests and app performance testing to our pipelines.
- Being the go to guy for all things regarding our codebase.

Tech stack: React, Redux, WebPack, JS (ES6), Node, Jest, Typescript, Sass, Git, Git Actions, Rest APIs

Fixr - November 2021 - June 2022 - Senior Frontend Developer - Working as part of a dedicated frontend team on the company's main ticketing site, ticket management system and various client sites.

Tech stack: React, Redux, WebPack, Zustand, JS (ES6), Typescript, Git, CircleCI, Styled components, Rest APIs.

Incentive Games - July 2020 - November 2021 - Frontend Developer - Working on various React and Redux based virtual games, with emphasis on cross platform/browser support. I worked across all our in-house projects, but put most of my time into our games management system, and took personal ownership of the Virgin Bet game Fives, which I found very rewarding to develop.

Tech stack: React, Redux, Sass, CRA, WebPack, JS (ES6), Git, Typescript, CircleCI, Rest APIs.

Markup Digital - November 2017 - July 2020 - Software Developer – Working on various Ecommerce sites that involved legacy javascript/HTML, Component Library, Design System and SPAs.

Tech stack: React, Redux, Sass, JS (ES6), WebPack, PHP (Symfony), Blade, Git, Jenkins, CircleCI, Rest APIs.

Equator - July 2016 - August 2017 - – Junior Frontend Developer – Working at EQTR involved developing Umbraco sites for use in different industries, and some special single page applications (using React). Even though my primary focus was front-end development, occasionally I would find myself doing some C# on the fly for new feature requests and prototyping.

Tech stack: React, Sass, Less, JQuery, JS (ES5), WebPack, Grunt, PHP (Wordpress), Git, C#

(Umbraco), Razor, Rest APIs.

Ibiza Digital Media - May 2015 – July 2016 - Junior developer - At IDM I developed and designed a range of custom Wordpress sites and web applications using laravel. My day to day work also included digital asset creation (graphics, photo editing, animation) for international marketing campaigns in web, print and social media.

Tech stack: HTML, CSS, Sass, JS (ES5), JQuery, PHP (Wordpress/Laravel), Git, MySQL, Rest APIs.

G1 PLC - April 2014 - May 2015 - Junior Developer - Working at G1 included doing back and front end work on various web based management systems for (properties, cinemas, restaurants, night clubs etc) using custom solutions. All together I helped develop and maintain a portfolio of 100 plus websites/web apps.

Tech stack: HTML, CSS, JS (ES5), JQuery, PHP (Vanilla), Git, MySQL, Rest APIs.

Freelance

DILF Productions - June 2023 - Present - Fullstack developer - The DILF Productions site, is a NextJs (JAM stack) site that serves as the homepage and ticket shop for the company. It integrates with several ticket service providers to allow for flexibility when selling tickets. Additionally, it has a customized CMS for publishing and managing content. My role involved designing a distributed system from scratch, coding the NextJs site, acting as dev ops and providing customer support.

Some achievements and things I'm proud of while working on this project are:

- Being part of a national (& international) project that serves a community I identify with.
- Making this part of the scene accessible to accessibility users.
- Gaining commercial experience on a NextJs site, and its pitfalls.
- Having ownership of an entire solution. I.e. Hosting, frontend & backend.
- While working as part of a team is great, developing my self reliance (being the only technical person working on this project) has been very rewarding personally and professionally.

Tech stack: React, Zustand, WebPack, JS (ES6), Node, Cypress, Typescript, Sass, Git, Git Actions, Rest APIs, Strapi, S3 Bucket, PostgreSQL.

Education

2013 CIMET Erasmus course (Spain & France) in Multimedia Technology, Image Processing, Photonics and Optics.

2008 – 2013 University of the West of Scotland – Bachelor of Science Multimedia Technology (with Honors).

Hobbies and interests

My interests and hobbies include: Working on web projects for local LGBTQ+ business, Sci-fi, animal care, skiing, hiking, kayaking, travel, photography, Image processing.
